

## § 24.242

## 27 CFR Ch. I (4–1–12 Edition)

(c) Incorporation by reference. The “Official Methods of Analysis of the Association of Official Analytical Chemists” (AOAC Method 11.003–11.004; 13th Edition 1980) is incorporated by reference in this part. This incorporation by reference was approved by the Director of the Federal Register, and is available for inspection or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: [http://www.archives.gov/federal\\_register/code\\_of\\_federal\\_regulations/ibr\\_locations.html](http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html). The publication is available from the Association of Official Analytical Chemists, 11 North 19th Street, Suite 210, Arlington, Virginia 22209.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

(Approved by the Office of Management and Budget under control number 1512-0298)

[T.D. ATF-299, 55 FR 24989, June 19, 1990, as amended at 69 FR 18803, Apr. 9, 2004]

### § 24.242 Authority to use greater quantities of decolorizing material in juice or wine.

(a) *Proprietor's notice.* If the proprietor desires to remove color from juice prior to fermentation or if color in excess of that normally present in wine develops during the production or storage of a particular lot or lots, and if the proprietor desires to use activated carbon in excess of twenty-five pounds per 1,000 gallons (3.0 grams per liter) of juice or wine to remove this color, the proprietor, prior to starting the treatment, shall submit to the appropriate TTB officer a written notice for each lot of juice or wine to be treated for decolorization. The written notice will state

- (1) The reason for the treatment;
- (2) The volume, kind, and type of juice or wine to be treated;
- (3) The kind and quantity of decolorizing material to be used; and,
- (4) The length of time the decolorizing material is in contact with the juice or wine.

(b) *Action by the appropriate TTB officer on proprietor's notice.* Upon receipt of the proprietor's notice, the appropriate TTB officer may require the proprietor to submit samples representa-

tive of the lot of juice or wine for examination by the TTB laboratory.

(c) *Samples and chemical analysis*—(1) *Samples.* If the appropriate TTB officer requires samples under paragraph (b) of this section, the proprietor shall prepare samples representative of the lot of juice or wine for examination. The samples will consist of:

- (i) The juice or wine before treatment with decolorizing material,
- (ii) The juice or wine after treatment with decolorizing material, and
- (iii) The decolorizing material used.

(2) *Chemical analysis.* If the TTB chemical analyses of the samples shows that the proposed treatment would remove only color and will not remove the vinous characteristics of the wine, the appropriate TTB officer will return an approved copy of the proprietor's written notice. If the TTB chemical analysis shows that the proposed treatment is not acceptable, the appropriate TTB officer will send the proprietor a letter stating the reason(s) for disallowing the proposed treatment.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

(Approved by the Office of Management and Budget under control numbers 1512-0292 and 1512-0298)

[T.D. ATF-299, 55 FR 24989, June 19, 1990, as amended by T.D. ATF-409, 64 FR 13683, Mar. 22, 1999]

### § 24.243 Filtering aids.

Inert fibers, pulps, earths, or similar materials, may be used as filtering aids in the cellar treatment and finishing of wine. Agar-agar, carrageenan, cellulose, and diatomaceous earth are commonly employed inert filtering and clarifying aids. In general, there is no limitation on the use of inert materials and no records need be maintained concerning their use. However, if the inert material is dissolved in water prior to addition to wine, then the records required by § 24.301 will be maintained. Filtering aids which contain active chemical ingredients or which may alter the character of wine, may be
